However, I have to say that I haven't met the holographic version This work shows
Categories: Research Science and Technology. More powerful than ever, LIGO fires back up to search for gravitational waves. We need one, unified theory which encompasses both, and that's a very hard problem that theoretical physicists have been working on for the better part of the last hundred years. Researchers have now found a way of detecting axions with the help of the Neand
far left denotes the holographic phase and the image is blurry because space and time are not yet well defined. This led to the suggestion that Nature is holographic.
