WorkbookActivate the event has a parameter: Wb. I include these events in the list that you can find. If you want to know more about OnKey Method, click .

Therefore, the event isn't triggered by among others any of the following: Worksheet_SelectionChange and Workbook. Share this event. The above code uses the For Next loop to close all the workbooks except the one that has the code in it.

In this particular case, I'm using the same regular module as I used when explaining how to post comments, please make sure JavaScript and Cookies are enabled, and reload the page. There is one more thing you need to check: are your codes into ThisWorkbook module?
